

## **Bob Tapella Talks About the White House's Nomination of William Boarman To Be the 26th Public Printer**

In an interview given after his keynote address at the Annual EFI Connect conference, Public Printer Bob Tapella talked with WhatTheyThink about GPO's achievements and the White House nomination of William J. Boarman to be the 26th Public Printer.

Mr. Tapella talked about his role as the Public Printer "The institution itself lives on, and it's not about the Public Printer. It's about our roles and responsibility and our mission to keep America informed about the workings of its government, to make the documents of our democracy widely available to the public and kept in perpetuity. That lives on beyond any individual."
